Spell	Lvl	Element	Type	PW	RCH	STK	Effect
Arcane Shield	I	Elder	Spell, Art of Enchanting, Ranged	—	16	1	Enchanted model gains +4 to its ARM value. This bonus cannot increase a model's ARM value above 6. In addition, Critical Hits scored against this model do not ignore ARM.

Glossary

Armor-Piercing. When making a Damage Roll for a Hit with this Trait you only add halved ARM value.

Bleeding. A model in this state must perform a Toughness roll in its every Strategic phase. A failed roll causes the model to suffer a Wound.

Burn (X). When a model suffers at least one Wound with this Trait, the attacking player may perform an X amount of Damage Rolls with ARM value 0. Every successful Damage Roll causes the model to suffer a Wound. If this wound causes a model to become Dead (State), the model is removed from the field.

Dead. A Dead model's Hitbox becomes the size and volume of its base. A Dead model cannot receive Activation Points and cannot perform Activations nor Reactions. Unless Stated otherwise, it cannot use or benefit from any Skills, Traits, Upgrades, Items etc. Unless stated otherwise it is ignored for all impacts like scoring in Quests, (Ranged) Friendly Fire, etc. and does not obstruct Movement, but a model may not end their Movement on top of a Dead model. When a model enters Dead State, it retains its other States. Unless specified otherwise, a Dead model cannot regain HP.

Engaged. During the movement step when in the Active role, an Engaged activated model may only declare Idle or Walk. However, if it declares Walk, it can only move directly towards the enemy model that is causing the Engaged state. If a model is Engaged by more than one model, it must choose one of the enemy models causing the Engaged state when declaring the Walk action and it must move directly towards that enemy model. While Engaged, a model may declare only Melee Attack, Assist (targeting itself) or Dodge. A model ceases to be Engaged when it leaves the melee weapon reach of the enemy model, Disengages with a Dodge, or by rendering the enemy model into the Incapacitated, Petrified, Crouched or Dead state. While a model is Engaged, it automatically has LoS to all enemy models that are causing it to be Engaged, but cannot react against models outside of its Awareness.

Immobilized. A model in this state cannot perform any Movement, Special Movement or Special Action. This state can be canceled with a successful Dodge, which may be performed either with Agility or Toughness. When it declares Dodge, it cannot move or enter/cancel the Crouched state, unless it performs a successful Dodge.

Incapacitated. When a model's HP reaches 0, it becomes Incapacitated and immediately enters the Crouched State. The model retains all other States. An Incapacitated model cannot receive Activation Points and cannot perform Activations nor Reactions. (Note: If it had remaining Activation Points at the time when it became Incapacitated, it keeps them until the End Phase of that turn). This State is canceled if the model regains at least 1 HP. If a model enters the Incapacitated State due to an effect but has more than 0 HP, the State is canceled during the model's next Strategic Phase. When canceled, the model may voluntarily cancel Crouched. An incapacitated Leader cannot use Stratagems. An already Incapacitated model that would suffer another Wound automatically becomes Dead. Unless stated otherwise, it cannot use or benefit from any Skills, Traits, Upgrades, Items, etc., and is ignored for all impacts such as scoring in Quests and Ranged Friendly Fire. They are still hit by Attacks, like AoEs or Sweep Attacks.

Knockback (X). A model Hit with this Trait is moved from the point where its Movement ended during the Movement step. It is moved for X inches away from the attacker at the end of the Resolution step (exact direction is the attacker's choosing). This Trait does not affect models two or more Sizes larger than the attacker.

Stagger. A model that suffers a Hit with this Trait loses 1 Activation Point (until the end of the turn). This Trait does not affect models two or more Sizes larger than the attacker.

Sweep. On a successful Attack roll, all models within this model's LoS and Melee Reach suffer a Hit.
