Classes

Mage. When casting a Spell, a Mage may spend an unspent Activation Point to reroll any number of dice. Mana Counters are a resource that represents mana - the energy required for casting Spells. Mana Counters can be spent to cover the price of Conjunction-type Spells or some other powerful Spells. When in the Active role, a Mage can convert any number of its Activation Points into the corresponding number of Mana Counters (replace Activation Points with Mana Counters) and place them in their personal pool. Mana counters are cumulative and do not disappear at the end of the turn!

Vitalist. Vitalists can cast Healing-Type Spells on allied models that are not in the Incapacitated or Dead state without having to perform a roll.

Traits

Affinity (Divine). A model with this Trait can cast (Divine) Spells. (For example: Divine = fire, water, profane, etc.)

Skills

Clairvoyance. In the Reactive Role, this model may declare a Reaction using Casting Aura Spells to target enemy models within its Awareness without requiring LoS. It ignores LoS restrictions caused by Environments, as well as the Blinded State and the Surprise Attack Trait of enemy models within its Awareness. In the Active Role, it does not suffer halving modifiers when casting Spells without LoS.

Glossary

Armor-Piercing. When making a Damage Roll for a Hit with this Trait you only add halved ARM value.

Bleeding. A model in this state must perform a Toughness roll in its every Strategic phase. A failed roll causes the model to suffer a Wound.

Blinded. A model in this state has no LoS (other than to itself) and cannot perform any actions other than Assist, Dodge or Nothing.

Burn (X). When a model suffers at least one Wound with this Trait, the attacking player may perform an X amount of Damage Rolls with ARM value 0. Every successful Damage Roll causes the model to suffer a Wound. If this wound causes a model to become Dead (State), the model is removed from the field.

Crippled. A model in this state has halved Speed and Agility.

Focus. Spells or Items with this Trait do not have a target when declaring Attack or Assist. Instead, the caster or the user is the center of the Effect and the specified models within the caster's Casting Aura become affected by the Effect of the Spell or Item with this Trait.

Poisoned. A model in this state must perform a Toughness roll with a -6 modifier in its every Strategic phase. A failed roll causes the model to suffer a Wound.

Targetless. When in the Active role, an Attack with this Trait does not require a model as a target. Instead, the target can be any surface on the field. If the Spell has both Casting Aura and AoE Reach, and the target is a flat surface/ground, then the template must be placed wholly within the Casting Aura.

Weakened. A model in this state has halved Toughness, and -1 Stamina.
